

Exceed One Has Started the Sale of a Security Application, "File Authority Designer for Windows," in the U.S.

TOKYO, JAPAN -- Exceed One Co., Ltd. is pleased to announce that it has started to deliver "File Authority Designer (FAD)" to the customers in the United States. File Authority Designer is a security application for Windows users.

By introducing File Authority Designer to your Windows, you can...

- simplify the procedure of the access authorization on each file and folder.
- check the current status of the authorization on each file and folder very easily.

Since the launch of File Authority Designer, it has been implemented in many Japanese government offices, companies, banks and educational institutions. The company has already provided File Authority Designer with 100 or more customers so far. Please refer to "The track record of introduction in Japan" below.

Features

- Set up access authority to many folders and files at once.
(easy to add, change, and remove)
- Display and save list of access authority. (can display and save in EXCEL format)
- Easy to use. (operational feeling is similar to that of Windows-Explorer)
- No need to install.
