Check “ON” the check box of “Output Size” and display the Size.

Check “ON” the check box of “Authority” and display the authority.

***In Free Edition, display only 10 rows information of Authority.**

***In Professional Edition, display 1 million rows information of Authority.**

Check “ON” the check box of “Share Folder” and display the information of share folder.

Check “ON” the check box of “Sort(Account)” and display the information sorted of “Group/User/Others”.

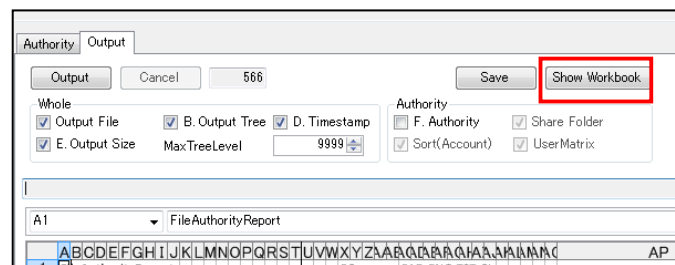

Check “ON” the check box of “User Matrix” and display the sheet of “UserMatrix”.

***The account information displays MAX 2,000 rows.**

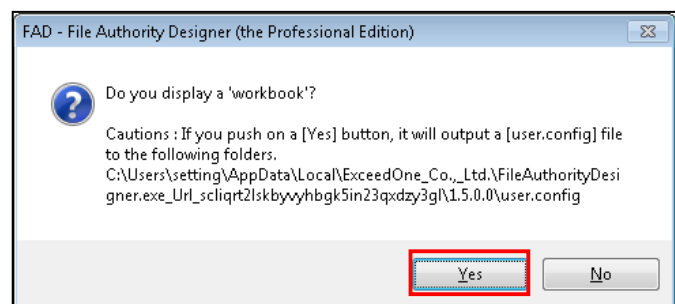

If the “MaxTreeLevel” is specified, output as a max that is in the specified into the “MaxTreeLevel”.

B) Display Workbook

B-1) Click “Show Workbook” button in order to display the information by the file of the Excel form.

B-2) Click “Yes” message is displayed.

B-3) Display the information by the file of the Excel form.

D-2) Choose an arbitrary conservative field places and save a file.

Save As

Desktop

File name: FileList_20140711_021239

Save as type: Microsoft Excel Workbook (*.xlsx)

Save Cancel

11. UserList

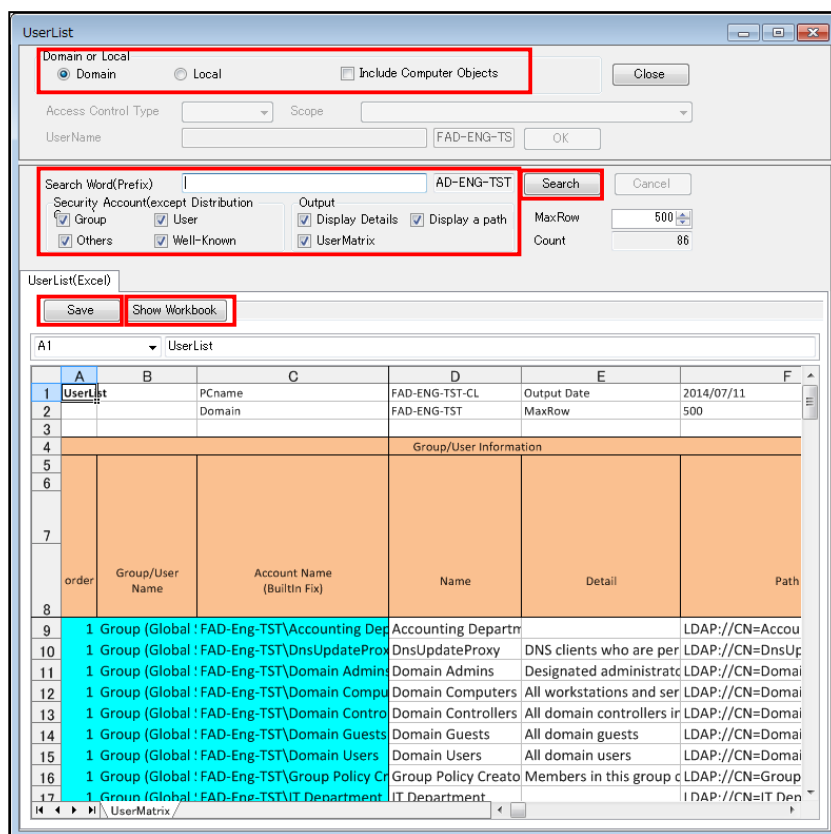

11-1. Click “UserList” => “Output UserList”.

11-2. Select and input “Domain or Local”, “Include Computer Objects”, “Search Word(Prefix)”, “Security Account(except Distribution)”, “Output”, and click “Search” button and then display the “User List”.

Click “Save” button in order to save the information currently displayed.

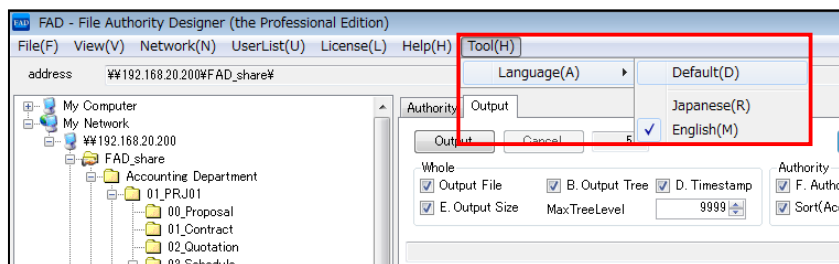

Click “Show Workbook” button in order to display the information by the file of the Excel form.

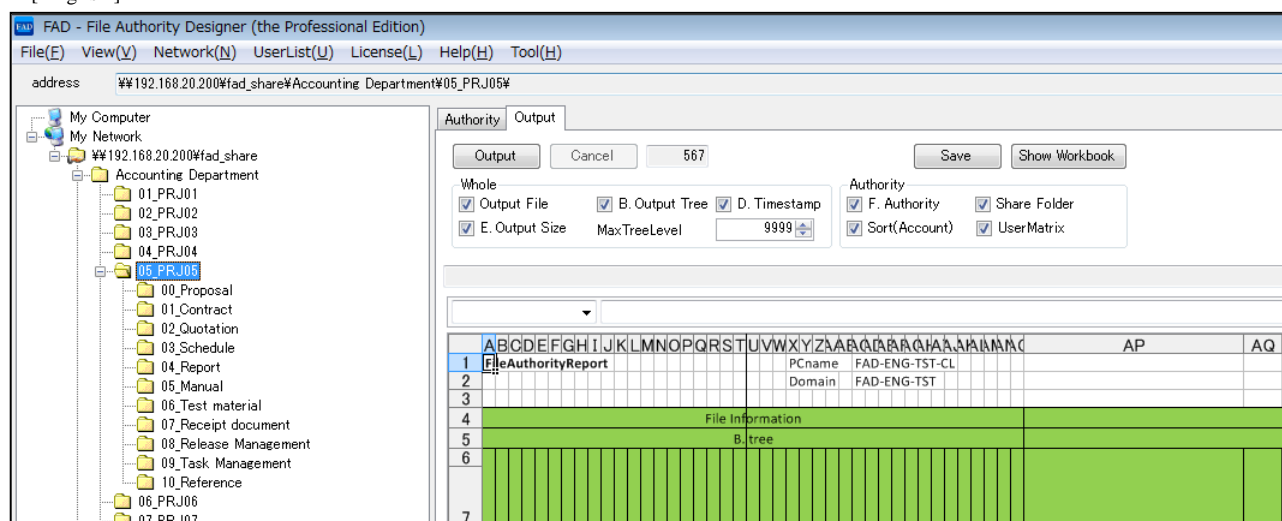

12. Change Language

Click “Tool” => “Language” and select language you wants.

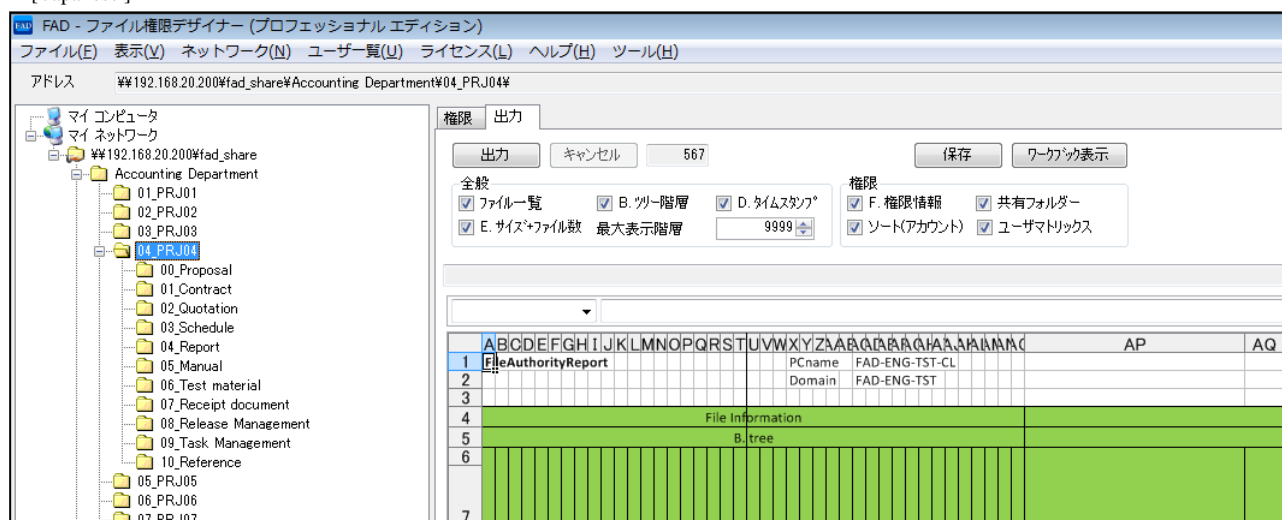

The screen is reset if you click “Default”, “Japanese”, “English”.

[English]

[Japanese]

"Default" is dependent on the setting of the "Region and Language" of Windows.

If “Japan” is set up, it will be displayed in “Japanese” and in the case of others, will be displayed in “English”.

Supplementary Explanation

I. Restriction of a Pathname

Pathname exceeding 260 characters serves as an error.

II. Function of file output (EXCEL format)

- Maximum number of rows and columns are a million.
- Maximum tree view is 40 rows (over 41 rows are in same direction)
- Maximum authority information is 2000 rows (over 2001 rows are in same direction)

III. Change specifications of set up file (From Ver1.5.0.0)

Saving each setup is changed kinds and specifications of file.

- Network connection information was saved to “Setting.xml” till Ver 1.4.2.0.
- Network connection information is changed to save to “FADConfig.xml” from Ver 1.5.0.0.

[Compatibility compliance]

When File Authority Designer starts, in case of there is the exiting “ Setting.xml “ in same folder with EXE file, set point of “Setting.xml” take precedence instead of “FADConfig.xml”.

This is treatment of backward compatibility, “Setting.xml” abolition after this.

IV. Initialize window configuring setting (after Ver 1.5.0.0)

Specification is changed to save following condition at the end, and recover at the start.

- Condition of main window (normal / maximum / minimum)
- Display position of main window
- Width of cell for ACL view

To reset these information, reset by following procedure.

- Finish File Authority Designer
- Delete “ FADConfig.xml “ existing same folder with EXE file
- Boot File Authority Designer. (boot by initialized configuring setting, then new “ FADConfig.xml “ is created.)
